A COMPLETE LINE OF SERUMS

that target all skin indications

SKIN RENEWAL LINE

JetSolution™ Skin Renewal provides a high-impact line of serums, specifically targeted for different levels of chemical exfoliation: light, mild, medium and strong. Skin Renewal Serums provide the right means to exfoliate carefully, effectively and never aggressively.

BIO-REJUVENATION LINE

JetSolution™ Bio-Rejuvenation is a complete advanced line of serums specifically targeted for the following anti-aging treatments: rejuvenation, lines & deep wrinkles, toning, younger skin preservation and oxidized skin.

It's a safe and painless alternative to Botulinum Toxin A and bio-revitalizing injections.

FUNCTIONAL LINE

JetSolution™ Functional provides a line of two serums that target very specific indications: couperose & sensitive skin and acne prone and oily skin.

WHITENING

JetSolution™ Whitening is a unique serum that contains two patented very effective compounds that target a rapid improvement of skin brightness, a reduction of sun and age spots and hyperpigmentation. JetSolution™ Whitening is also an excellent antioxidant.

SCALP & HAIR CARE

Jetop is a very exclusive serum developed for treating the scalp in a painless and pleasant way, achieving significant reduction in the rate of hair loss.

A full treatment with Jetop also allows to achieve lusher and super glowing hair.

BOOSTER LINE

JetSolution™ BOOSTERS are recommended for improving treatment results even further. To be infused at the end of a full procedure, the boosters target: rejuvenation, hydration & moisturization, lines & wrinkles, brightness, collagen production stimulation, oxidized skin and acne-prone & oily skin.

JET DETOX WATER™

CODE: JS-JDW

Soothing and Purifying

250 ml bag

INDICATIONS & PROTOCOLS

- Lymphatic drainage
- Hydradermabrasion
- Soft peeling
- Chemical peel wash-off
- Pre-procedure deep cleaning
- Post-procedure lenitive action

MAIN ACTIVES

- Saline Solution 0.3%
- Aloe Barbadensis
- Silver Oxide
- Hyaluronic Acid

USE AND ACTION

With the multifunctional Jet Detox Water™, the practitioner can perform a deeply detoxifying lymphatic drainage prior to peeling and infusion. Thanks to the aloe barbadensis and silver oxide added to the formula, Jet Detox Water™ allows for a very deep cleansing, and an anti-bacterial and a purifying action. Jet Detox Water™ was developed for both very delicate peelings (when the skin is extremely delicate and the use of glycolic acid is not suitable) and to neutralize and wash off the glycolic acid residues after a chemical peeling. Hyaluronic acid enhances hydration and leaves the skin smooth, aloe provides calming and healing benefits and silver oxide detoxifies.

MAIN ACTIVE INGREDIENTS

• Aloe Barbadensis

It has been shown that the skin can absorb the key ingredients of Aloe up to seven layers deep. Thanks to this attribute, aloe effectively stimulates proteolytic enzyme action and fibroblast activity in skin tissue. Because of this enzymatic breakdown of dead skin cells, aloe is an excellent cleansing and detoxifying agent with an ability to remove dead skin cells and toxins while purifying the pores.

It also has antimicrobial properties targeted against many common bacteria and fungi. It soothes and moisturizes the skin and serves as an anti-inflammatory agent as it has burn healing, scar reducing, and wound healing properties.

• Silver Oxide

Its properties consist of a great bactericidal, antifungal, antiviral effects in addition to its ability to reactivate tissue metabolism.

Many studies have demonstrated its efficacy in the treatment of dermatitis, burns, warts, wounds, acne, and eczema.

• Hyaluronic Acid

The formula also contains hyaluronic acid that improves hydration and gives the skin an immediate silk-touch effect.

CODE: JS-SR1

2 vials containing 50 ml each

RENEWAL COMPLEX I

5% Glycolic Acid

INDICATIONS & PROTOCOLS

- Soft chemical exfoliation
- Delicate to normal skin
- Younger sensitive skin
- Acne prone & oily skin
- Light hyperpigmentation
- Light sun & age spots
- Phototype VI

MAIN ACTIVES

- 5% Glycolic Acid
- Aloe Barbadensis
- Vitamin B5

USE AND ACTION

A formulation with 5% glycolic acid combined with soothing and repairing ingredients, Renewal Complex I is perfect for light to medium exfoliations. It is particularly recommended for sensitive to normal skin types to achieve an effective full-area exfoliation that will leave the skin clean and bright. It is also recommended for specific areas that suffer from hyperpigmentation and sun or age spots. Renewal Complex I provides a good exfoliation results on acne-prone and oily skins as well. Remember to wash off residues of Renewal Complex I with Jet Detox Water™ after this stage of the treatment prior to moving on to the next one. It is recommended to avoid direct sun exposure and to apply sun screen lotion for one day after the treatment.

MAIN ACTIVE INGREDIENTS

- Glycolic Acid

Renewal Complex I contains a concentration of 5% glycolic acid at pH 3.3. As an exfoliant, it helps shed dead skin layers and renew the skin's surface, to visibly soften age signs, particularly those caused by sun damage.

After an exfoliation with Renewal Complex I, the skin is deeply cleansed, brighter, and ready to receive the nutrition that will be provided by the following infusion of active ingredients, as chosen by the practitioner based on the patient's needs.

- Vitamin B5 & Aloe Vera

Renewal Complex I is enriched with soothing aloe Vera and Vitamin B5, which are effective in preventing excessive redness. These two ingredients considerably lower the typical itching sensation of glycolic acid, making this step of exfoliation a pleasant and calming experience.

RENEWAL COMPLEX 2

CODE: JS-SR2

10% Glycolic Acid

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- Chemical exfoliation
- For normal to thick skin
- Acne prone & oily skin
- Not suitable for very sensitive skin
- Normal to severe hyperpigmentation
- Normal to severe sun & age spots

MAIN ACTIVES

- 10% Glycolic Acid
- Aloe Barbadensis
- Vitamin B5

USE AND ACTION

This formulation of 10% glycolic acid, in combination with soothing and repairing ingredients, was developed for medium to strong exfoliations. It is particularly recommended for use on sensitive and thin skin, with emphasis on areas suffering from hyperpigmentation and sun or age spots, to achieve a full-area exfoliation that leaves the skin clean and bright.

Exfoliating with Renewal Complex 2 provides great results on acne-prone and oily skins as well.

Remember to wash off residues of Renewal Complex 2 with Jet Detox Water™ after this stage of the treatment prior to moving on to the next one. It is recommended to avoid direct sun exposure and apply sun screen lotion for one day after the treatment.

MAIN ACTIVE INGREDIENTS

- Glycolic Acid

Renewal Complex 2 contains a concentration of 10% glycolic acid at pH 3.3. As an exfoliant, it helps shed dead skin layers and renew the skin's surface, to visibly soften age signs, particularly those caused by sun damage.

After an exfoliation with Renewal Complex 2, the skin is deeply cleansed, brighter, and ready to receive the nutrition that will be provided by the following infusion of active ingredients, as chosen by the practitioner based on the patient's needs.

- Vitamin B5 & Aloe Vera

Renewal Complex 2 is enriched with soothing aloe Vera and Vitamin B5, which are effective in preventing excessive redness.

These two ingredients considerably lower the typical itching sensation of glycolic acid, making this step of exfoliation a pleasant and calming experience.

CODE: JS-SR3

2 vials containing 50 ml each

RENEWAL COMPLEX 3

16% Glycolic Acid

INDICATIONS & PROTOCOLS

- Strong chemical exfoliation
- For thick and resistant skin
- Acne prone & oily skin
- Severe hyperpigmentation
- Severe sun & age spots
- Not recommended for sensitive skin
- Not recommended during summer

MAIN ACTIVES

- 16% Glycolic Acid
- Aloe Barbadensis
- Vitamin B5

USE AND ACTION

This formulation of 16% glycolic acid, in combination with soothing and repairing ingredients, was developed for medium to strong exfoliations. It is particularly recommended for use on thick and resistant skins, with emphasis on areas suffering from hyperpigmentation and sun or age spots, to achieve a full-area exfoliation that leaves the skin clean and bright.

Exfoliating with Renewal Complex 3 provides great results on acne-prone and oily skins as well.

Remember to wash off residues of Renewal Complex 3 with Jet Detox Water™ after this stage of the treatment prior to moving on to the next one.

It is recommended to avoid direct sun exposure and apply sun screen lotion for two days after the treatment.

MAIN ACTIVE INGREDIENTS

- Glycolic Acid

Renewal Complex 3 contains a concentration of 16% glycolic acid at pH 3.3. As an exfoliant, it helps shed dead skin layers and renew the skin's surface, to visibly soften age signs, particularly those caused by sun damage. After an exfoliation with Renewal Complex 3, the skin is deeply cleansed, brighter, and ready to receive the nutrition that will be provided by the following infusion of active ingredients, as chosen by the practitioner based on the patient's needs.

- Vitamin B5 & Aloe Vera

Renewal Complex 3 is enriched with soothing aloe Vera and Vitamin B5, which are effective in preventing excessive redness. These two ingredients considerably lower the typical itching sensation of glycolic acid, making this step of exfoliation a pleasant and calming experience.

RENEWAL COMPLEX 4

CODE: JS-SR4

Mandelic & AHA

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- Gentle chemical exfoliation
- For sensitive to normal skin
- Acne prone & oily skin
- Suitable for summer exfoliation
- Light to normal hyperpigmentation
- Light to normal sun & age spots
- Suitable for Phototype VI

MAIN ACTIVES

- Mandelic Acid
- Malic Acid
- Tartaric Acid

USE AND ACTION

Renewal Complex 4 is our product of choice for a deep yet very gentle exfoliation for sensitive skin. It is the product to prefer during summer months since the active ingredients do not react with light and sun protection is not needed after treatment. After exfoliation with Renewal Complex 4, the practitioner proceeds directly to infusion, without the need to wash off the product.

The active ingredients in this formula remain active and continue their gentle exfoliating activity in the hours following the session.

MAIN ACTIVE INGREDIENTS

- Mandelic Acid

With Mandelic Acid as a main ingredient, Renewal Complex 4 is highly recommended for patients with sensitive skin who tend to suffer from irritation. In some cases, irritation can stimulate pigment-producing cells to produce more melanin, especially amongst those with a darker complexion. This is not likely to occur with mandelic acid. Because of its gentle properties, mandelic acid is the most recommended exfoliant for patients suffering from rosacea. Its antibacterial properties are also very helpful in treating acne as it regulates sebum production.

- Malic Acid

Malic Acid is a preferred ingredient in facial skincare products because it has balanced humectant and skin penetration properties. It removes dead cells revealing a fresh, new layer. Suitable for use with sensitive skin types and darker skin tones, as it causes less irritation than glycolic acid while yielding similar results. In addition, malic acid is an antioxidant that helps protect from free radicals and premature aging. It significantly reduces symptoms of rosacea and improves melasma. It causes substantial reduction of acne breakouts and it is a potential acne scars improver.

- Tartaric Acid

Tartaric acid has keratolytic and astringent properties, it moisturizes the skin, stimulates the metabolism, promotes healing and it has an anti-aging effect. It is less irritating than some other exfoliating as it gently removes dead skin cells from the uppermost layers of skin. Tartaric acid, like other AHAs, is great for almost all skin types; sensitive, dry, combo and oily skin. Thanks to its keratolytic and astringent properties it helps dissolve skin flakes or tougher layers of skin. This gentle exfoliant also has hydrating properties because it helps bind moisture to skin, which is useful for treating dry skin conditions. Tartaric acid is also a great source of antioxidants for skin since it is derived from antioxidant-rich fruits. For this reason it helps protect from damage caused by free radicals and environmental aggressors like UV rays, pollution, and more.

Renewal Complex 4 formula also contains other important ingredients such as betaine, orange fruit extract, sugar cane, hyaluronic acid, ruscus, calendula, malva sylvestris, aloe barbadensis, sugar maple, soybean protein, lemon fruit extract, chamomile, bisabolol and rice bran protein.

CODE: JS-AA1

2 vials containing 50 ml each

ANTI-AGING COMPLEX I

Hyaluronic Acids

INDICATIONS & PROTOCOLS

- For all anti-aging protocols
- Wrinkles and lines
- Deep hydration
- Lift-up action
- Silk- touch effect
- Young stretchmarks
- Younger skin preservation

MAIN ACTIVES

- Low molecular weight Hyaluronic Acids
- Bio-peptides

USE AND ACTION

The basis for most Bio-Rejuvenation treatments, Anti-Aging Complex I can be used as part of any anti-aging protocol, whether alone or alternated, session by session, with a different anti-aging complex.

The Anti-Aging Complex I formula contains several hyaluronic acids and bio-peptides. The hyaluronic acids feature different molecular weights with strong water retention power; seamlessly reducing water vaporization from the skin and deeply enhancing hydration, tone, and texture. The bio-peptides improve the skin's natural biological processes to reverse its aging and enrich the formula for a longer lasting anti-aging effect. The particular combination of these two premium active ingredients produces a superior lift-up and silk touch effect.

MAIN ACTIVE INGREDIENTS

• Hyaluronic acids

This special formulation is based on 4 types of hyaluronic acids with different formulas and molecular weights:

1. Pure hyaluronic < 10,000 Dalton of molecular weight
2. Hydrolyzed hyaluronic acid < 10,000 Dalton
3. Sodium hyaluronate < 100,000 Dalton
4. Sodium hyaluronate of a molecular weight between 1,000,000 and 1,800,000 Dalton HA.

The different molecular weights improve not only its own permeation but also the permeation of the other active ingredients it carries in combination.

• Bio-peptides

The bio-peptides stimulate the fibroblasts that are responsible for the health of elastin and collagen, empowering the skin's innate biological processes to maintain health and helping reverse aging.

ANTI-AGING COMPLEX 2

CODE: JS-AA2

Vegetal Stem Cells & Peptides

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- For all anti-aging protocols
- Hydration enhancer
- Firming action
- Cell turnover stimulation
- Lift-up effect
- Wrinkles and lines

MAIN ACTIVES

- Vegetal stem cells
- Hexapeptides
- Pentapeptides

USE AND ACTION

Anti-Aging Complex 2 is the perfect complementary component to Complex 1. While Complex 1 targets deep hydration and tightening, which is the first stage in treating aging skin, Complex 2 significantly stimulates cellular regeneration.

It contains well-known anti-aging ingredients such as algae extracts, argireline, betaine, rice protein, buddleia davidii, soybean protein, and thymus. Some of the active ingredients are purposefully formulated in smaller sized molecules for better penetration and retention.

MAIN ACTIVE INGREDIENTS

• Vegetal Stem Cells

Already naturally present in the human body at birth, stem cells enhance skin rejuvenation, encourage preservation of healthy skin, beauty, and youth. Vegetal stem cells are considered a real elixir of youth. Obtained from plants, they significantly improve the process of cutaneous regeneration as they boost effective cellular stimulation.

• Hexapeptides and Pentapeptides

Hexapeptides and pentapeptides provide a tightening effect and reduce the visible appearance of lines and wrinkles.

CODE: JS-AA3

2 vials containing 50 ml each

ANTI-AGING COMPLEX 3

Tone

INDICATIONS & PROTOCOLS

- Anti-aging firming protocols
- Skin tightening
- Hydration
- Lift-up action
- Enhances radiofrequency procedures
- Sensitive skin
- Recommended for hands
- Recommended for chin, neck & décolleté
- Recommended for breast & body areas

MAIN ACTIVES

- Vitamin B5
- Collagen boosting peptides

USE AND ACTION

Anti-Aging Complex 3 is the serum of choice to achieve the best tightening effect with deep hydration.

It can be used in all sessions of an anti-aging skin tightening protocol, or can be alternated with Anti-Aging Complex 1.

Complex 3 is a preferred product for body, hands, neck, and breast.

In addition to vitamin B5 and collagen boosting peptides, the formula is enriched with a number of other active ingredients such as betaine, sodium hyaluronate, watermelon extract, rice bran protein, algae extract, ginseng root extract, and echinacea root extract.

MAIN ACTIVE INGREDIENTS

• Vitamin B5

Already naturally present in all living cells, Vitamin B5 is one of the best ingredients for skin care as it offers a remarkable tightening and permeating action. Upon application to the skin, it is readily absorbed into the lower layers, deeply nourishing and toning the tissues. As a humectant with high hydrating power, it stabilizes the skin barrier function, reducing the amount of water loss. It is also ideal for the treatment of dry, scaly, or rough skin. By jetting Vitamin B5, you'll deeply improve the skin's hydration, softness, and elasticity.

• Collagen boosting Peptides

These peptides assist in controlling the puffy skin areas. By soothing and nourishing the skin, they compensate for collagen loss, providing an instant but also long-lasting firming effect. This is the reason why Anti-Aging Complex 3 is the most recommended serum to enhance the effect of radiofrequency procedures.

ANTI-AGING COMPLEX 4

CODE: JS-AA4

Antioxidant with CBD

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- Oxidized skin
- Recommended for lip bar code
- Recommended for eye contour
- Hydration and skin luminosity
- Energizes dull skin
- Resores skin flexibility

MAIN ACTIVES

- Cannabidiol
- Cannabis Sativa Hemp Seed Oil
- Terminalia Ferdinandiana Fruit Extract
- Vitamins A, C, E

USE AND ACTION

Extracted from Cannabis Sativa, Cannabidiol and Virgin Hemp Seed Oil provide the Anti-Aging Complex 4 with a variety of substantial benefits. The antioxidant effect helps counteracting signs of aging caused by free radicals, and the natural emollient features prevent moisture loss and restore the skin suppleness and flexibility. Enriched with Terminalia Ferdinandiana Fruit Extract, commonly known as Kakadu Plum Extract, and a variety of vitamins A, E and C, Anti-Aging Complex 4 is the ideal solution for oxidized skins and as a repair to sun exposure damages.

MAIN ACTIVE INGREDIENTS

• Cannabidiol (CBD)

Extracted from the cannabis sativa plant, CBD has potent antioxidant effects helping the body keep cell regeneration and reducing the signs of early cell oxidation by free radicals. CBD is proved to enhance the production of collagen.

• Cannabis Sativa Hemp Seed Oil

With a remarkably fatty acid profile Hemp Seed Oil is a rich source of polyunsaturated essential fatty acid, linoleic (C18:2) and alpha – linolenic (C18:3). This composition makes Hemp Seed Oil an excellent natural emollient. It prevents moisture loss and restores the skin suppleness and flexibility.

• Terminalia Ferdinandiana

Fruit Extract Extracted from the Australian Kakadu plum, the world's highest source of vitamin C. Kakadu plum is an astonishing Australian superfruit which has developed a unique antioxidant defence system for protection of extreme UV exposure. Containing an antioxidant cocktail of polyphenols, mainly gallic and ellagic acids it helps to reduce skin damage induced by oxidative stress, energizes dull looking skin and Improves the skin radiance & luminosity.

• Vitamins A, C, E

Vitamins are essential for maintaining optimal levels of skin health, appearance, and function. Eating nutrient-dense foods, taking vitamin supplements, and using topical products containing vitamins can all be beneficial. In addition to helping skin look its best, vitamins can also be used to manage a variety of skin conditions, such as acne blemishes, and the effects of photoaging.

CODE: JS-AAPB

1 vial containing 50 ml step1
+ 1 vial containing 50 ml step2

POWER BI-PHASIC

Red Carpet Effect

INDICATIONS & PROTOCOLS

- Anti-aging shock treatment
- One shot "special event" treatment
- Anti-aging protocol for mature skin
- Anti-aging protocol for deep wrinkles
- Glowing glam effect

MAIN ACTIVES

VIAL 1	VIAL 2
• Hyaluronic Acid	• Vegetal Stem Cells
• Bio-Peptides	• Betaine

USE AND ACTION

Power Bi-Phasic treatment is definitely the most promising application for the fastest and longest-lasting anti-aging results using the Jet Technology because during the same session the practitioner uses 2 different but complementary products infusing 8 ml of serum. After a careful exfoliation infuse 4 ml of Power Bi-Phasic 1 and then infuse 4 ml of Power Bi-Phasic 2.

Power Bi-Phasic is recommended either as a protocol of a weekly 6-session series for aging skin, or as a single shock treatment when an immediate firming and glowing effect is required.

MAIN ACTIVE INGREDIENTS

VIAL 1:

- Hyaluronic Acids

This special formulation is based on four types of hyaluronic acids with different formulas and molecular weights to ensure the best penetration.

- Bio-Peptides

By interacting with molecules that can signal cells to produce more collagen, bio-peptides are thought to stimulate cell activity, resulting in firmer and more compact skin. The specific bio-peptides contained in Power Bi-Phasic 1 are considered "age-reverse peptides" that protect DNA from damage, stimulate its natural repair, and enhance cellular longevity and vitality. Power Bi-Phasic 1 formula also contains rice bran protein, soybean protein, and oxidoreductases.

VIAL 2:

Power Bi-Phasic Vial 2 contains a very high concentration of some of the most powerful and effective ingredients for strong anti-aging results.

- Vegetal Stem Cells

These provide multi-level protection of the collagen network by boosting new collagen synthesis and preventing its loss. They act as potent antioxidants, providing anti-inflammatory effects and protection against UV radiation.

- The formula also contains:

Betaine, rice bran protein, soybean protein, equisetum extract and echinacea extract. The combination of these ingredients with vegetal stem cells stimulates the skin proteins to activate micro-circulation and to incite cell reproduction.

INDICATIONS & PROTOCOLS

- Oxidized skin
- Recommended for lip bar code
- Recommended for eye contour
- Hydration and silk-touch effect
- Alternative to Botulinum Toxin A injections
- Prolongs Botulinum Toxin A injections effect

MAIN ACTIVES

- Argireline
- Betaine
- Hyaluronic Acid

USE AND ACTION

Because the ATX-NAT is based on argireline, its effect is very similar to that of Botulinum Toxin A. But instead of paralyzing the muscles like Botulinum Toxin A does, it actually relaxes them in a natural way. The result is firmer skin and a subsequent improvement of lines and wrinkles. ATX-NAT is recommended to treat oxidized skin, as an alternative to Botulinum Toxin A injections or to prolong its effect. It is also suggested the localized infusion of this serum on lip bar code and on eye contour.

MAIN ACTIVE INGREDIENTS

• Argireline

A peptide made of six amino acids, argireline has a very similar activity to that of Botulinum Toxin A. Argireline is used in the ATX-NAT Solution for its ability to reduce deep wrinkles. It has a superior safety profile compared to Botulinum Toxin A, which, unlike argireline, irrevocably breaks the SNAP-25 protein, impedes the creation of the SHARE complex and consequently paralyzes the muscle.

• Betaine (TMG)

An organic compound that is commonly found in plants, betaine has the ability to modulate effects of hyperosmolarity on cell functions. It's used for protection against osmotic stress, drought, high salinity or high temperature. Intracellular accumulation of betaines permits water retention in cells, protecting from the effects of dehydration. Betaines also increase cell membrane fluidity, facilitating the absorption of nutrients in the cell.

• Hyaluronic Acid

The formula also contains hyaluronic acid that improves hydration and provides the skin with an immediate silk-touch effect.

CODE: JS-SPI

1 vial containing 50 ml

SKIN PERFECTOR

Finishing & Home Care Cream

Jet Solution SKIN PERFECTOR

INDICATIONS & PROTOCOLS

- Long lasting Hydration
- Complexion Perfector
- Luminosity and Shine
- Firmness & Gentle Repair
- Butulinum-like action

MAIN ACTIVES

- Three specific Tetrapeptides
- Hexapeptide
- Coenzyme Q10
- White Lily Extract
- Vitamin E
- Allantoin

USE AND ACTION

JetSolution™ SKIN PERFECTOR Finishing Cream has been specifically developed to complete and boost the results of hydroporation treatments performed the original JetSolution™ serums. Applied immediately after the treatment, this cream provides an immediate lenitive and soothing action and helps the active ingredients delivered during the procedure penetrate further into skin. It is also highly recommended as a home care product to be applied night and day during the period of the protocol to boost and prolong the treatments results. Its light texture makes it a perfect make up base as well. With a surprisingly light, yet very hydrating texture, JetSolution™ SKIN PERFECTOR contains specific active ingredients that help regenerate the skin for a healthier looking and incredibly radiant complexion.

MAIN ACTIVE INGREDIENTS

- **Three specific Tetrapeptides:** they fight skin sagginess by inducing the synthesis of elastin and collagen I. They provide a strong anti-wrinkle effect and reduce the cutaneous photo damage.
- **A Hexapeptide** with a Botulinum-toxin like action it reduces the depth of wrinkles caused by the contraction of muscles.
- **Coenzyme Q10:** counteracts the damage caused by UV radiation and pollution and keeps collagen and elastin in an optimal shape.
- **White Lily Extract:** excellent for dry and tired skin, this active ingredient is able to dissolve hardening of connective tissues providing a skin renewal and brightening action. It restores shine, elasticity and tone.
- **Vitamin E:** a strong natural antioxidant with moisturizing, lenitive and anti-inflammatory activity.
- **Allantoin:** It has exceptional healing, moisturizing and anti-irritating properties. It has a keratolytic action, meaning that it causes ketratin in the skin to soften, smoothing skin surface.

SENSISKIN

CODE: JS-FNI

Couperose & Sensitive Skin

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- Sensitive skin
- Couperose
- Rosacea
- Acne prone sensitive skin
- Skin texture luminosity
- Calms and protects from UV damage

MAIN ACTIVES

- Aloe Barbadensis
- Niacimide
- Azelaic Acid
- Troxerutin

USE AND ACTION

The Sensiskin is recommended for treating very sensitive skin, especially the couperose condition. Thanks to the unique, effective ingredients in this formula, this serum provides strong anti-inflammatory as well as anti-aging benefits. Combined with the ability to purify the pores from toxins and dead cells, it provides a very safe protection against UV rays, ensuring a brighter and more glowing complexion. The Sensiskin is highly recommended for oily skin and for those suffering from acne and rosacea. For extremely sensitive skin, exfoliation is recommended prior to the infusion of this product, either with Jet Detox Water™ or with Renewal Complex 4.

MAIN ACTIVE INGREDIENTS

- **Aloe Barbadensis Extract:** This extract soothes the skin, protects it from UV damage, and serves as an anti-inflammatory agent. It has burn-healing, scar-reducing and wound-healing properties. It contains many vitamins that are effective for protecting the skin against the activity of free radicals. It effectively stimulates fibroblast growth, plus it's an excellent cleansing and detoxifying agent with the ability to remove dead skin cells and toxins while purifying the pores.
- **Niacinamide:** As melanin gives the skin its dark pigment and increases UV absorption, high melanin levels may result in age spots, freckles, and hyperpigmentation. Niacinamide is a derivative of Vitamin B3 that suppresses melanin from reaching the surface of the skin, protecting the skin from further UV damage. Use of Niacinamide results in reductions of fine lines and wrinkles, hyperpigmented spots, red blotchiness, and skin sallowness (yellowing). Niacinamide also improves elasticity.
- **Azelaic Acid:** Thanks to its antibacterial properties, azelaic acid is a well-known treatment for acne and rosacea. It is keratolytic and comedolytic by means of controlling disordered growth of the skin cells. It has moisturizing and elasticizing effects, and it illuminates and improves the skin's texture clarity for a glowing complexion. Its bleaching properties makes it useful in addressing uneven skin tone and dark spots, while improving skin quality for a brighter and more luminous appearance.
- **Troxerutin:** An anti-inflammatory ingredient, troxerutin keeps the skin balanced and even-toned. It calms irritated tissues and helps regeneration of healthy skin. It decreases the formation of inflammation mediators to a great extent.

CODE: JS-FN3

2 vials containing 50 ml

PURE

Acne Prone & Oily Skin

INDICATIONS & PROTOCOLS

- Acne prone & oily skin
- Soothing & calming
- Sebo-regulating
- Antibacterial
- Purifying

MAIN ACTIVES

- Acnacidol
- Palmitoyl Tripeptide-8
- Aloe Barbadensis
- Phytic Acid

USE AND ACTION

Containing a combination of ingredients specifically targeted for improving sebo-regulation, acting against bacterial and fungal pathogens and having a healing effect, the Pure Complex is the most indicated product for re-establishing the physiological balance in acne-prone skin.

For best results, it is highly recommended to infuse the Pure Serum after a careful exfoliation using Jet Detox Water™ if the skin is extremely sensitive, or Glycolic Acid (choose the best concentration according to skin type and condition) if the skin is normal. In case of exfoliation with Glycolic Acid it is preferable to alternate it, session by session, with Renewal Complex 4 (Mandelic).

MAIN ACTIVE INGREDIENTS

- **Acnacidol:** Acnacidol is a unique compound aimed at reestablishing the physiological balance in acne prone skin that gives excellent results for sebo-regulation and as an anti-bacterial. It is composed of 10-Hydroxydecanoic Acid (10-HDA), a synthetic mio-mimetic version of hydroxyl acid naturally present in Royal Jelly, Sebacic Acid and 1,10-Decanediol.
- **Palmitoyl Tripeptide-8:** It is a true neuro-cosmetic specifically designed to prevent and reverse redness and swelling. It maintains and restores a normal skin sensitivity threshold.
- **Aloe Barbadensis Leaf Juice:** Barbadensis Leaf Juice exerts a healing action. It stimulates the formation of fibroblasts and connective tissue, thereby promoting wound repair and the growth of skin repair process. It is important to underline Aloe's remarkable action against many common bacterial and fungal skin pathogens and its importance as an antiseptic power.
- **Phytic Acid:** Phytic Acid is antioxidant by nature, derived from cereal and fruit seeds and bran of natural plants. Many health benefits of PA include its use as skin lightening, moisturizing, and controller of sebum.

The formula also contains Heptapeptide-10 that reduces pruritus thanks to its soothing and calming action and Hydrolyzed Nettle Leaf Juice that acts as an astringent, recommended for a purified, less shiny, and less oily skin.

WHITENING COMPLEX I

CODE: JS-WHI

2 vials containing 50 ml each

INDICATIONS & PROTOCOLS

- Hyperpigmentation
- Sun&Age spots
- Antioxidant action
- Brightening
- Skin luminosity

MAIN ACTIVES

- Stay-C Vitamin™
- Bio-White™

USE AND ACTION

Containing innovative and very strong whitening ingredients that act as a color pigment inhibitor, the infusion of the Whitening Complex I with the Jet Technology immediately achieves the desired effect of a brighter, more uniform skin tone – which improves session by session. It effectively removes sun and age spots as well as spots resulting from scars. In addition, Stay C-Vitamin™ makes this product highly recommended to achieve a uniform bright complexion.

For a strong immediate brightening effect it is recommended to exfoliate with Glycolic Acid prior to infusing the Whitening™ solution. For more sensitive skin or during summer months or for Phototype VI, exfoliate with Mandelic Acid.

MAIN ACTIVE INGREDIENTS

- Stay C-Vitamin

Whitening Complex I contains a high concentration of the registered Stay C-Vitamin™, a stable Vitamin C that is resistant to oxidation.

- Bio-White

The registered Bio-White™ included in the formula is a compound of natural whitening extracts: lemon balm, achillea, grapevine, blackberry and skullcap. Crowberry extract and licorice further enhance whitening and help against redness.

CODE: JT-HSI

JETOP

Scalp & Hair Care

INDICATIONS & PROTOCOLS

- Hair loss
- Alopecia
- Hair glow and brilliance
- Healthy scalp and hair growth

MAIN ACTIVES

- Pomegranate
- Capixil
- Redensyl

USE AND ACTION

Jetop is the state-of-the-art method for treating the scalp in a painless and pleasant way, achieving significant reduction in the rate of hair loss. From an aesthetic point of view, Jetop targets lusher and super glowing hair.

First step: Perform a careful exfoliation using Jet Detox Water™. The unique micro-jet cleansing method achieves optimal and very deep cleansing, effectively ridding the scalp of dead cells, excessive oil, sweat and grime. The result is a fresh and clean scalp that is ready to receive the benefits of the active ingredients contained in the Jetop Solution. The micro-jet action provides a thorough scalp massage that promotes micro-circulation, sending blood flow to strengthen the hair follicles. The massage energizes hair while lowering stress and tension.

Second step: Infusion of Jetop Solution. Once the scalp is cleaned and micro-circulation is stimulated, active components can penetrate successfully. Jetop Solution provides an effective delivery of a valuable nourishment which promotes the reduction of hair loss rate, stimulates hair growth, and makes the hair look lush, glowing and bright.

MAIN ACTIVE INGREDIENTS

- Pomegranate

Very rich in antioxidants, pomegranate revitalizes dull and dry hair, and protects it from environmental pollution and chemicals. Its properties contribute to reconstructing and strengthening the hair; stimulating hair growth and giving it a fuller, brighter and more glowing look.

- Capixil

An innovative complex of biomimetic peptides combined with red clover extract, Capixil targets the main causes of hair loss, enhancing fuller and thicker hair: Biochanin A, the major isoflavone in red clover; modulates chronic inflammation and functions as an antioxidant, limiting damage to the skin and scalp caused by free radicals. The result is reduction in hair loss and stimulation of hair growth.

- Redensyl

A special compound of herbal ingredients that targets stem cells and human fibroblasts from the dermal papilla to encourage hair growth and reduce hair loss. Redensyl increases hair growth by 214% and has better results than minoxidil, which is the gold standard in this area.

BOOSTER HA

Hyaluronic Acid

CODE: JS-HA

4 vials containing 20 ml each

INDICATIONS & PROTOCOLS

- Hydrating & soothing
- Moisturizing
- Collagen boosting
- Antioxidant
- Wrinkles & lines

MAIN ACTIVES

- Hyaluronic Acid
- Dipeptide Diaminobutyroyl
- Hydrolized Rice Protein
- Lactic Acid

USE AND ACTION

JetSolution™ Hyaluronic Acid Booster is particularly indicated in case of loss of hydration, firmness, and collagen. It is suggested to add the infusion of 2 to 4 ml of this serum at the end of a complete treatment, if needed, to further improve the results.

MAIN ACTIVE INGREDIENTS

• Hyaluronic Acid

As the chief glycosaminoglycan in skin, hyaluronic acid works to keep every aspect of the skin stable, safeguarded, and constantly renewed. It has the stunning capacity to attract and hold vast amounts of moisture – it enhances moisture content and revitalizes skin's outer layers so the skin looks and feels softer, smoother, and, especially, radiantly hydrated. It instantly improves the appearance of fine lines and wrinkles.

• Dipeptide Diaminobutyroyl

An active ingredient used for its capability to inhibit muscle contractions and reduce wrinkles, it provides similar results to Botulinum Toxin A but with a safer safety profile. The formula is enriched with soybean protein, rice bran protein, and saccharide isomerase.

• Hydrolized Rice Protein

It is an active ingredient that regulates melanin production and has been used for years to help brighten and lighten the complexion. It also contains lipoic acid, a very good anti-oxidant and Vitamin B5 which improves cellular circulation.

• Lactic Acid

Lactic acid is an alpha hydroxy acid, or AHA. It is used to remove dead skin cells, lighten dark spots, and improve the look of fine lines and wrinkles.

CODE: JS-B5

4 vials containing 20 ml each

BOOSTER B5

Vitamin B5

INDICATIONS & PROTOCOLS

- Skin tone
- Smoothing
- Hydrating and Antioxidant
- Moisturizing
- Lenitive

MAIN ACTIVES

- Vitamin B5
- Saccharide Isomerate
- Buddleja Davidii

USE AND ACTION

Vitamin B5 is recommended when a moisturizing and tightening result is needed. In addition, Vitamin B5 has a remarkable repairing and calming action, which makes it a preferable choice for use on sensitive and irritated skin. It is suggested to add the infusion of 2 to 4 ml of JetSolution™ Vitamin B5 at the end of a complete treatment to further improve the results.

MAIN ACTIVE INGREDIENTS

• Vitamin B5

With a remarkable tightening and permeating action, Vitamin B5 is readily absorbed into the lower layers when applied to the skin, deeply nourishing and toning the tissues. It has a high hydrating action, working as humectant by infusing water in the cells, retaining moisture deep within the tissues. For this reason and because it has a mild effect on the skin, Vitamin B5 is often recommended for irritated skin and wrinkles.

• Saccharide Isomerate

It is able to bind to skin cells creating a moisture reservoir and a constant protective hydration film.

• Buddleja Davidii

Buddleja Davidii is the extract of summer lilac or butterfly-bush is a good ingredient with some antioxidant and anti-inflammatory properties but it is proved that the meristem cell culture is even better:

It contains among others verbascoside and isoverbacoside that have not only antioxidant and anti-inflammatory but also photoprotective activity. What's more, it has phytosterols, amino acids and polysaccharides, all useful for skin moisture.

The formula is also enriched with: glycosaminoglycans, rice bran protein, thymus vulgaris, watermelon, dunaliella salina extract and citrulline.

BOOSTER VC

Vitamin C

CODE: JS-VC

4 vials containing 20 ml each

INDICATIONS & PROTOCOLS

- Antioxidant
- Collagen boosting
- Protection against UV rays
- Antioxidant
- Wrinkles & lines
- Sun & Age spots and hyperpigmentation

MAIN ACTIVES

- Vitamin C
- Watermelon Fruit Extract
- Dunaliella Salina Extract
- Citrulline

USE AND ACTION

JetSolution™ Vitamin C infusion is highly recommended to brighten skin up and to improve hyperpigmentation and sun & age spots. It is also an excellent product for younger skins suffering from acne and an excellent antioxidant product. It is suggested to add the infusion of 2 to 4 ml of Booster Vitamin C at the end of a complete treatment to further improve the results.

MAIN ACTIVE INGREDIENTS

• Vitamin C

Oxidative stress occurs when the cells of the body sustain permanent damage due to highly reactive particles known as free radicals. Contained in sunlight and in elements in the atmosphere, free radicals are constantly acting on the body, producing microscopic amounts of damage. Over time, this damage accumulates, leading to the development of signs of aging.

One of the key benefits of Vitamin C is its ability to limit oxidative stress. Vitamin C plays a critical role in the maintenance of a normal mature collagen network, lightens up dark skin, improves spots, and controls the formation of senile keratosis.

• Watermelon Fruit Extract

This plant extract, like most types of melon, is a rich source of antioxidants, including lycopene. Watermelon plants produce solutes that protect the cells against drought, heat & UV-rays by a DNA-protecting mechanism. It improves the appearance of aged and stressed skin, gives the look of a younger, regenerated skin. It reduces appearance of skin redness after UV irradiation.

• Dunaliella Salina Extract

It's a rich source of Beta-Carotene and has potent anti-oxidant benefits.

• Citrulline

It is an organic compound and amino acid that's highly present in the rind of watermelon. In cosmetics, this ingredient mainly functions as a skin conditioning agent with potential antioxidant benefits and wrinkles.

CODE: JS-AE

4 vials containing 20 ml each

BOOSTER AE

Vitamin A+E

INDICATIONS & PROTOCOLS

- Skin cell renewal
- Antioxidant
- Repairing
- Soothing and hydrating
- Wrinkles and lines

MAIN ACTIVES

- Vitamin A
- Vitamin E
- Thymus Vulgaris Extract
- Helianthus Annuus Seed Oil

USE AND ACTION

Vitamin A+E is a multifunctional anti-aging serum which helps stimulate cell renewal and collagen production, particularly indicated for sun damaged and sensitive skin. It is suggested to add the infusion of 2 to 4 ml of JetSolution™ A+E at the end of a complete treatment to further improve the results.

MAIN ACTIVE INGREDIENTS

• Vitamin A

Facilitating communication between cells, Vitamin A encourages aging cells to continue their renewal process, and regenerate collagen and elastin to prevent the appearance of aging skin, wrinkles and fine lines. The small molecular structure of Vitamin A contained in this solution facilitates its penetration into the outer layers of the skin allowing it to work to repair the lower layers where collagen and elastin reside.

• Vitamin E

As an antioxidant superstar, Vitamin E reduces the formation of free radicals from exposure to UV rays, promoting a healing process, strengthening the skin's barrier function, protecting the lipid balance of the skin's barrier; and reducing trans-epidermal water loss. Vitamin E helps improve the overall appearance of the skin, plus it decreases inflammation and boosts the production of new cells.

• Thymus Vulgaris Extract

It's the extract derived from the leaf or flower of the thyme plant. It has potent antioxidant properties.

• Helianthus Annuus Seed Oil

It is sunflower oil. Non-volatile, non-fragrant plant oil used as an emollient in cosmetics. Sunflower seed oil has the ability to help replenish and soothe skin. It's a rich source of fatty acids skin can use, including linoleic acid, and is excellent for dry skin.

The formula is also enriched with dunaliella salina extract, buddleja davidii extract, watermelon, rice bran protein, soybean protein and superoxide dismutase.
